

GROW YOUR STORY IN HORTICULTURE

UNL DEPARTMENT OF
AGRONOMY AND HORTICULTURE

Grow your story at the University of Nebraska-Lincoln. Here you will get personal attention at a Big Ten university and learn from faculty who work to feed and enrich the lives of a growing global population.

Horticulture Club has been incredibly valuable for my future career. Because of a connection I made last year during a club trip to Orlando, I was selected to be a Plant Science Intern at Disney World's Epcot®. Horticulture club allowed me opportunities to gain extensive plant production and leadership skills, and build my resume.

MELINDA KNUTH

CAREERS IN HORTICULTURE

HORTICULTURE

Horticulture is the science and art of growing and using fruits, vegetables, flowers, ornamental plants and grasses to enhance our living environment and to diversify human diets. Horticultural crops are typically produced on a smaller scale with more intensive management than agronomic crops. Many horticultural crops are grown for aesthetic enjoyment and recreation. Start your career now with a degree in Horticulture.

ERICA HUGHES GRADUATED IN DECEMBER 2015
Currently the greenhouse manager at Faller Landscapes in York, Neb.
Interned at Faller Landscapes in 2013.

Anyone interested in a horticulture career should checkout UNL. The professors are knowledgeable, challenging, inspiring and they create a comfortable classroom atmosphere. As a teaching assistant I experienced one-on-one learning, opportunities to communicate with my peers and take a leadership role.

KRISTINA ALAS

HORT 467-Planting Design was the best class. I learned not only about placing plantings and how to develop a creative thinking process, but also life skills such as how to relate to clients, how to present designs and how to be a saleswoman. There is a high level of competition in this field and I believe I have developed the skills to stand out to clients in a positive manner.

SHAYNE NIELSEN

JOHN RYCKMAN CURRENT STUDENT, GRADUATES IN DECEMBER 2015
