

INTEGRATING GENOMICS AND BIOINFORMATICS IN THE WHEAT BREEDING PROGRAM FOR THE DEVELOPMENT OF SUPERIOR CULTIVARS

Presented by

VIKAS BELAMKAR

*Research Assistant Professor, Agronomy and Horticulture,
University of Nebraska-Lincoln*

Agronomy and Horticulture Fall 2017 Seminar Series

Vikas Belamkar will highlight the evaluation and utilization of genotyping-by-sequencing, marker-assisted selection, and genomic prediction for cultivar development. Real-case scenarios and success stories from the collaborative USDA-University of Nebraska-Lincoln wheat breeding program will be shared.

FRIDAY
November 10
3:30 pm

Refreshments served at 3pm

**Keim Hall, Room 150, East Campus
University of Nebraska-Lincoln**
