Leveraging on the power of farmer data to empower agricultural research

Increased regulatory pressures on the environmental influence of agriculture and requirements for farm reporting on factors affecting environmental impact will likely increase. Grassini will show how on-farm data provide an unprecedented opportunity to benchmark the impact of management practices on yield and efficiencies of water and fertilizer applications and to orient high-cost, multi-year, multi-site field studies.

FRIDAY
March 11, 2016
3:30 pm
Keim Hall, Room 150
Refreshments served at 3 pm

Presented by
Patricio Grassini
Assistant Professor, Water for Food Institute Fellow,
UNL Agronomy and Horticulture
