

CREATING A NEW GENERATION OF SYSTEMS THINKERS: AGROECOLOGY AND PHENOMENOLOGY

February 17

3:30 pm

Presented by

CHARLES FRANCIS

*Professor, UNL Agronomy and Horticulture, Visiting Professor
of Agroecology, Norwegian University Life Sciences*

Agroecology has emerged as an alternative and holistic approach to systems thinking in education, applying phenomenology and practical experience along with science as valuable foundations for learning. Working with farmers and food system professionals, student teams use open-ended case studies to pursue education for responsible action. Agroecology explores production, economic, environmental and social dimensions of food systems, with

innovative programs in Norway, the U.S. Midwest, Sweden, Uganda, Ethiopia, and India, as well as many countries in Latin America.

**Keim Hall, Room 150
UNL East Campus
Refreshments served at 3pm**
