

# Part-time Student Worker Needed

**The Soil Management Laboratory of the Agronomy and Horticulture Department is looking for a responsible and dependable student for the following duties:**

- Assist researchers with the execution of field and laboratory experiments in soils.
- Travel to field sites for establishing new experiments, monitoring existing experiments, conducting field tests, and collecting soil and plant samples.
- Assist with analysis of physical and chemical properties in the laboratory.

Supervisors will train the student in the specific field and laboratory work.

**Our lab works with management of cover crops, crop residue, biochar, and warm-season grasses for improved soil health.**

## **Requirements:**

- Available to work one or two full days per week.
- Attention to details for quality research.
- Be organized, team player, and promote a positive work environment.
- Be willing to learn methods of field and laboratory experiments on soils.
- Must be able to lift up to 50 lbs. occasionally.
