WANTED: SYSTEMS PROFESSIONALS TO MEET AGRICULTURE’S FUTURE NEEDS

Presented by

GARY HEIN
Director, Doctor of Plant Health Program, University of Nebraska-Lincoln

Spring 2018 Agronomy and Horticulture Seminar Series

A myriad of issues challenge the economic and environmental sustainability of plant production systems. The Doctor of Plant Health program provides a comprehensive education across disciplines to enable effective systems management and implementation of technology advances. These plant doctors provide knowledge intensive leadership required for future sustainable plant production systems.

FRIDAY
April 13
3:30 pm
Refreshments served at 3pm

Keim Hall, Room 150, East Campus
University of Nebraska-Lincoln
