

FROM TRANSCRIPTS TO THE TRI-STATE: EXPLOITING PLANT DENSITY TOLERANCE TO IMPROVE AN AMERICAN DELICACY

Presented by

MARTY WILLIAMS

Ecologist, USDA-ARS, Adjunct Professor, University of Illinois

Spring 2019 Agronomy and Horticulture Seminar Series

Over the last century, the United States has led the development and production of sweet corn globally. Despite improvements in eating quality, yields have stagnated in recent decades. Williams will present research, from the level of the gene to the upper Midwest, which the industry is now exploiting to improve sweet corn production.

FRIDAY
March 15
3:30 pm

Refreshments served at 3 pm

Room 150, Keim Hall, East Campus
University of Nebraska-Lincoln
