

DECISION-MAKING DURING DROUGHT: WHAT SPURS A RANGE MANAGER TO TAKE ACTION?

Presented by

TONYA HAIGH

*Project Manager Rural Sociologist, School of Natural Resources,
National Drought Mitigation Center, University of Nebraska-Lincoln*

Spring 2019 Agronomy and Horticulture Seminar Series

In 2016, a quickly-developing drought event occurred across the northern U.S. High Plains. Range and livestock managers made decisions throughout the drought that had consequences in terms of their farm/ranch finances, productivity, and ecological health. This talk will highlight managers' drought management decisions, outcomes, information used, and the conditions and practices that led to improved outcomes.

FRIDAY
April 19
3:30 pm

Refreshments served at 3 pm

Room 150, Keim Hall, East Campus
