

MODELING THE EFFECTS OF CLIMATE CHANGE ON U.S. CORN AND SOYBEAN PRODUCTION

April 28
3:30 pm

Presented by

GUI BAIGORRIA

Assistant Professor, UNL Agronomy and Horticulture

The projections for corn and soybean production till the end of the century were simulated and analyzed based on the CropClimate platform for the United States. The results of each individual ensemble member from all the available climate models projecting climate change will be presented.

Keim Hall, Room 150
UNL East Campus
Refreshments served at 3pm
